

RENO QRP GROUP SLOW SPEED CW QRP NET REPORT

Hi all;

The log of our last slow speed NET on June 13, 2024, is attached.

The NET was held from Hidden Valley Park in Reno, NV.

The weather was sunny calm and HOT.

The NET started on time at 10:00 am on 7.045 MHZ. The noise level was S3.0 the SFI 165 A index 5 K index 1 Xray C2.3

There were 8 QNI today Woody K1LB, Craig AE7I, Derek W7DLZ, Joe KM6HJP, Phil AB7WE, Bob KA6NSN, Rob KA6JLT, Roy W7HJL, (There would have one more but QRM got in the way for Dave KI7SJE).

First up was Woody he was in the field at POTA location USA 4391umbolt-Toiyabie nation Forest. Woody found a shady place to do his operation his signal was solid 599.

Next was Craig in the field in his back yard also in the shade he was using his new KH1 at 5 watts into his EFHW. By e-mail Craig told me that he will be going to Norway soon and he will be taking the KH1 with him his call will be LA/AE7I.

Derek was home in Lemmon Valley north of Reno using his Yaesu FT DX 10 at ten watts he was solid to me. Derek reported RSt's for OP's also said the temp was 85 F.

Joe from Doyle, CA was next his RST was good at 589 today. Joe uses the IC 7300 into his EFHW inverted "L" the temp at his QTH was 88F.

Phil from his home in NW Reno had RST of 579 to me. Phil used the IC7300 at 10 watts his antenna is also an end fed inverted "L"

up 20 ft. Phil continued with more RST reports he also reported the temp to be 80 det F.

Bob from Quincy, CA was 559 today he reported to me with a 579 with QSB. Bob reported the temp was 77 degrees F. bob uses the Yeasu FT 747 at ten watts into his COBRA antenna.

Rob from home using a indoor random wire on the ceiling. Rob was using his UBITX version 7 with power at 4 watts. (Rob was a little off frequency at 7.045.36) his was strong at 599. Rob reported the off Set still needed some tweaking.

Last to report was Roy from Walla Walla, WA using his K3 at 15 watts into his vertical . He reported that Dave KI7SJE was trying to reach me, but I never heard him.

While the NET was running, I did hear some QRM on us this happens, and we need to ignore it as much as possible. Over-all it was a good session.

The NET was closed at 11:06 AM.

**The next NET will be JUNE 27, 2024, starting at 10:00 AM
THIS IS THE TIME OF YEAR TO GET IN THE FIELD.**

Hope to hear you all again. 73/72 Ed/WD7Y

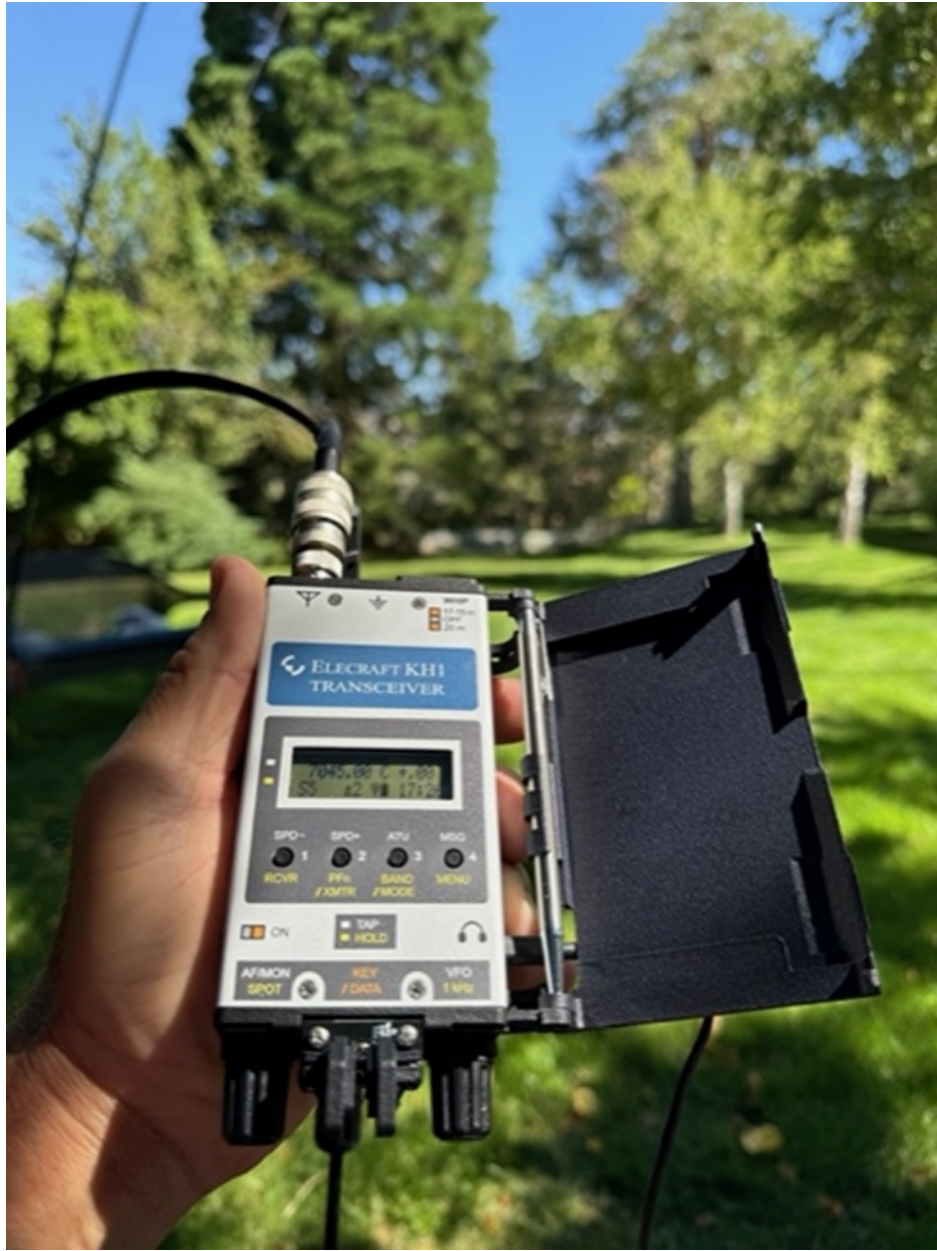

In the meantime, check out the Reno QRP WEB Page.

RENO QRP GROUP SLOW SPEED CW QRP NET REPORT

Hi all;

The log of our last slow speed NET on June 27, 2024, is attached.

The NET was held from Hidden Valley Park in Reno, NV.

The weather was sunny calm and warm.

The NET started on time at 10:00 am on 7.045 MHZ. The noise level was S2.5 the SFI 181 A index 9 K index 1 Xray C1.3

There were 5 QNI today Woody K1LB, Roy W7HJL, Bob KA6NSN, Phil AB7WE, and Krystal AJ6GC I/O. I am sure that there was one more out there trying to check in as I heard the thumping sound of keying, I searched with my RIT who ever it was, was not even close to frequency.

First up was Woody he was in the field at POTA location USA 4391Humbolt-Toiyabie Nation Forest. Woody uses the IC 7300 at 10 watts into his EFHW 30 ft high. Woody was at this location at the last session I guess in a shady spot.

Roy from Walla Walla reported in next his signal at best was 559 there was deep QSB, but I copied most all. Roy uses his K3 this

time at 10 watts into his long wire of 190 feet I don't remember him using it before maybe it is a new antenna.

Bob from Quincy, CA reported in his signal a good 599 but some QSB got him too. He was using his FT 747 at ten watts into his COBRA antenna. Bob reported RST's and the weather at 66 degrees F.

Phil was last to report from his home in NW Reno, NV. Using his IC7300 at 10 watts he was strong today at 589. He made a full report of his weather and RST reports for all.

The NET was closed at 10:39 AM.

I am sorry to say that there will only be one session for the NET in July. Normally the next session would be on July 4, I think we should stay away from that date. So the next session will be on July 18, 2024.

**The next NET will be JULY 18, 2024, starting at 10:00 AM
THIS IS THE TIME OF YEAR TO GET IN THE FIELD.**

Hope to hear you all again. 73/72 Ed/WD7Y

In the meantime, check out the Reno QRP WEB Page.
